## Stakeholder Communication, Participation, and Consultation

During Project Design	This supplementary financing was for meeting the cost overrun due to currency fluctuation and price increases. There is no (i) physical change within the original scope and/or design, or modified or incremental activities or components, and (ii) change in environment and social safeguards requirements. Extensive consultations were carried out during project formulation in 2003.
During Project Implementation	As a part of the scope of the Project under original loan, an awareness campaign through various media was undertaken to make the public aware of the short-term inconveniences and long-term benefits of the Project to gain the full support of the beneficiaries. Beneficiaries were also made aware of preventive care to avoid environmental health-related hazards and of their responsibilities to avoid wasting water, including issues such as water rates, user charges, property tax reform, etc. for achieving the goals of the Project. In addition, the campaign provided feedback to the PMU to adjust the work program based on the impact of the campaign and concerns raised by the beneficiaries.
