| Linkage to Country/Regional Strategy  quality, continuity, and coverage. The city also has a good, low-cost sewage treatment system. However, service provision is not uniform across the city and is increasingly strained by economic expansion. As shown in Table 1, service is better in the city center than in the periphery. This is both a problem and an opportunity. The problem is that the number of vulnerable households has grown rapidly in the periphery as the population has declined in the center, which is subserviced. The opportunity arises from the KMC's ability to generate revenues from a still-large population with higher income in the center, with which to fund investment in the periphery. The city has worked hard to narrow service disparities. Efforts started with two loans provided in 2000 and 2006 for the Kolkata Environmental Improvement Project (KEIP), which financed the renovation of 564 kilometers (km) of the sewer drain network and the rehabilitation of three sewage treatment plants, raising the percentage of the population with direct sewer connection from 31% in 2001 to 43% in 2011. The service coverage for water supply is higher than for sewerage, but disparities between central and peripheral areas remain, particularly in service continuity. Unless addressed rapidly, these disparities will widen as population shifts from the center to the periphery.   | Description   | 4.5 million and contributes at least 13% of West Bengal's gross domestic product. # **Project Outcome**

| Description of Outcome  | Improved water supply, sewerage, and drainage service quality and operational sustainability in selected areas of KMC   |
|---|---|
| Progress Toward Outcome Tranche 1 implementation ongoing.           |   |
| Implementation Progress   |   |
| Description of Project Outputs                                      | Inefficient water supply assets rehabilitated.<br>Sewerage extension to peripheral areas continued.<br>Financial and project management capacity further developed. |
| Status of Implementation Progress (Outputs, Activities, and Issues) | Under Tranche 1, five civil works packages awarded, three of which started construction in 2014.  |
| Geographical Location   |   |

## **Summary of Environmental and Social Aspects**

consideration.

| <b>Environmental Aspects</b>     | В  |  |
|----------------------------------|--|--|
| Involuntary Resettlement         | В  |  |
| Indigenous Peoples               | С  |  |
| Stakeholder Communica            | tion, Participation, and Consultation  |  |
| During Project Design            | Ouring Project Design  Consultations have been held throughout the planning and design stage with Mayor, PMU, KMC officials and state government departments like Pollution Control Board (PCB). Walk through informal discussions have been held with the local community along the proposed transmission stretch to asses the kind of impacts.   |  |
| During Project<br>Implementation | The design and technique adopted by KMC has helped address and mitigate potential social issues associated with works. However, information disclosure is an integral part of safeguards planning during project implementation. Consultations and information disclosure will be carried out at different stages of the project cycle. Consultation measures envisaged for the project are: (i) KMC will inform through its officials and contractor about the construction schedule to minimize the temporary impacts; (ii) PMU will ensure that the affected people's if any will be identified and informed about the assistance to be provided for any temporary loss of livelihood; and (iii) attempts will be made to ensure that |  |

#### **Business Opportunities**

| Consulting<br>Services | All consultants will be recruited accroding to ADB's Guidelines on the Use of Consultants (2013, as amended from time to time). The procurement plan indicates the threshold, mode of procurement, and consultant selection, review procedures, and contract packages. |
|------------------------|--|
| Procurement            | All procurement of goods and works will be undertaken in accordance with ADB's Procurement Guidelines (2013, as amended from time to time). The concurred standard bididng documents for the national competitive bidding will be used throughout the Facility period. |

vulnerable groups, if any, will understand the process and that their specific needs will be taken in to
